### E2SE N005

### Cleaning Agent / Oil Dispersant

#### GENERAL INFORMATION

E2SE N005 is a concentrated blend of nonionic, **biodegradable**, and alkaline surfactants in water, formulated for the use as a foaming liquid cleaning agent. The E2SE N005 is also a very powerful oil dispersant very well suited for use on open sea because of its readily biodegradable active material. This product has been developed as a cleaning agent for greased and with oil contaminated surfaces (like metals but also floors etc.) and has very strong emulsifying properties.

#### PRODUCT DESCRIPTION

Blend of nonionic biodegradable and alkaline surfactants in water.

#### PHYSICAL PROPERTIES

Appearance	Clear Yellowish liquid
Density, 20°C	1,02 g/cm <sup>3</sup>
Viscosity, 20°C	Approx. 25 mPa.s
Flash Point	Not applicable
Freezing Point	Approx. -10 °C
Solubility	In Water

#### APPLICATION

As cleaner the E2SE N005 can best be applied by brushing or spraying the greasy and contaminated areas, which are then washed off with water after 10 - 15 minutes. On contact with water a rapid emulsification of oil and grease will take place due to the active ingredients of the E2SE N005. For treatment of oil spills on surface waters, the E2SE N005 is sprayed over the contaminated area.

#### DELIVERY

Delivery in 1000 Litre containers, 200 Litre drums, 25 or 10 Litre cans. Transport by road: Not applicable in accordance with ADR
