

TECHNICAL DATA SHEET

E2SE N532

Heavy Duty Cleaner/Degreaser

GENERAL INFORMATION

E2SE N532 is a blend of nonionic surfactants in a hydrocarbon solvent formulated for use especially in the oil related industries. The concentrated product works as a "softener" on hydrocarbon pollution and has strong emulsifying effects in contact with water. Therefore, it enables the oil-fractions to disperse in the water-phase.

PRODUCT DESCRIPTION

Concentrated blend of nonionic surfactants in a hydrocarbon solvent.

PHYSICAL PROPERTIES

Appearance	Clear liquid
Density, 20°C	0,90 g/cm ³
Viscosity, 20°C	< 40 mPa.s
Flash Point	> 62 °C
Melting /Pour point	-30 °C
Solubility	Soluble in hydrocarbon solvents

APPLICATION

For cleaning purposes, the E2SE N532 is applied by brushing or spraying the greasy and contaminated objects, which are then washed off with water after 5-15 minutes. On contact with water a rapid emulsification of oil and grease will take place due to the action of the E2SE N532.

DELIVERY

Delivery in 1000 Litre containers, 200 Litre drums, 25 or 10 Litre cans. Transport by road: UN 3082: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Hydrocarbons, C10, aromatics, >1% naphthalene)
